IES FRANCISCO DE GOYA

NOMBRE: Martin Taboada
CURSO: DAM 2

Programación Multimedia y Dispositivos Móviles: Cambiar Fondo

A continuación se presentarán evidencias sobre el ejercicio planteado en el aula virtual, se presentarán tanto las imágenes como el texto plano del fragmento del código:

MainActivity.kt

```
package com.example.changebgcolor

import android.app.Activity
import android.content.Intent
import android.graphics.Color
import android.os.Bundle
import androidx.activity.result.contract.ActivityResultContracts
import androidx.appcompat.app.AppCompatActivity
import com.example.changebgcolor.databinding.ActivityMainBinding

class MainActivity : AppCompatActivity() {

    private lateinit var binding: ActivityMainBinding

    // Registrar el contrato para obtener el resultado de la segunda
actividad
    private val colorPickerLauncher = registerForActivityResult(
        ActivityResultContracts.StartActivityForResult()
    ) { result ->
        if (result.resultCode == Activity.RESULT_OK) {
            val data: Intent? = result.data
            val colorHex = data?.getStringExtra("COLOR_HEX")
            val colorName = data?.getStringExtra("COLOR_NAME")

            if (colorHex != null && colorName != null) {
                // Aplicar el color de fondo al layout principal

binding.mainLayout.setBackgroundColor(Color.parseColor(colorHex))
                // Actualizar el texto indicando el color seleccionado
                binding.tvCurrentColor.text = "Color actual: $colorName"
            }
        }
        // Si se cancela o se pulsa atrás, no hace nada y mantiene el color
actual sin errores.
    }

    override fun onCreate(savedInstanceState: Bundle?) {
```

```
        super.onCreate(savedInstanceState)
        binding = ActivityMainBinding.inflate(layoutInflater)
        setContentView(binding.root)

        binding.btnChooseColor.setOnClickListener {
